

Beds That Last a Lifetime

When you select a bed, it should be with the thought of using it a number of years.

A bed is one article of furniture that you insist upon being correct from the start. And you want assurance of its lasting qualities.

We will show you a wide selection of just such beds. Their long wear is a matter we can guarantee.

See the Line of Brass Beds that we are showing in our windows this week. Then step into the store and get the prices.

The turntable near the Central Vermont station was wrecked this forenoon about 9:30 o'clock when a freight train got away from the shifting crew and crashed into the pit, one car going off the rails. The crew had shunted a string of several flat cars onto the track furthest from the station platform and the brakemen could not stop them as usual, the brakes not holding. The cars were loaded with rough granite and there were some dozen pieces of the stone on the car that fell into the turntable pit. The heavy truck went over the brink, tipping the car at an angle of 30 degrees and breaking the coupling on the car next behind. The platform to the table was shattered, about half of it being crushed beneath the heavy weight. No one was hurt in the accident. As yet work to repair the damage has not commenced but a derrick car will probably be brought from the yards at Montpelier or St. Albans sometime to-day. The heavy stones will have to be taken from the car before it can be put back on the track and extensive repairs must be made to the turntable before it can be made serviceable again.
